APRIL 20, 2026, APRIL 22 - APRIL 24, 2026	32 HRS		

Weekly Accomplishments

The student trainee should give a summary of the tasks performed during the week and how it was accomplished.

Day 50

I worked on website optimization and user experience (UX). I changed the basic call-to-action (CTA) elements and put back the text to buttons that were misaligned and can mislead users to make it more user-friendly. I also transformed the headline on the homepage to value proposition and rearrange the hierarchy of some pages so that it can grab the user's attention.

Day 51

I also told Ma'am Doris about the company benefits and asked her to share the feedback of Ma'am Leah on the company benefits. Today, I learned that the HMO and Retirement Insurance were not on the website, so I just added them. Following Sir Bernabe's advice that I will be turning over the project, I performed an audit to the site to make sure that it is secure. I noticed that the data in the project was sent to the developer's test email when I tested the PHP email script, before I turned over the project. I have fixed the issue by re-configure the plugin and connecting it with corporate email.

Day 52

I also provided an audit trail of emails from the site to assist the information technology team to get carbon copies of emails. This will help them to see the inquiries made from the site on a daily as well as monthly basis. Also, I have audited the site and forward all the PHP custom codes, plug-ins used and also given some strategic guidance on how to maintain and enhance the site in future.

Day 53

Now I have port-forwarded the corporate site to the production WordPress site. I have backup of the system, deactivated all the unnecessary plug-ins to release the memory and have upgraded the plug-ins to the latest version. Finally, I have done the turnover and audit report of the project.
