

WEEKLY JOURNAL

Last Name RIO	First Name JOSHUA ALNIE		MI P.
STI Campus STI COLLEGE TANAUAN	Program BSIT	Year Level 4	Section B
Host Company MAYO HOLDINGS AND CONSTRUCTION (MHC), INC.	Department Assigned to MITSD		
Schedule (Date): FEBRUARY 23, 2026 - FEBRUARY 27, 2026	Number of Working Hours: 40 HRS		

Weekly Accomplishments

The student trainee should give a summary of the tasks performed during the week and how it was accomplished.

Day 13

I designed the contact pages and began implementing the design concepts as instructed by Ma'am Yvette. I subsequently attended the meeting on the Leave System, where I took notes. With this, I was in a position to understand how to make effective presentations and explain to the end-user how the system will be constructed.

Day 14

I kept on working on the webpage and consulted Ma'am Yvette on possible structures. I also helped Sir Jerico with the Preventative Maintenance Schedule (PMS) of the laptops in the other building. In the evening, Ma'am Yvette instructed me on the process of communicating with the client, particularly on how to collect requirements and then proceed to explain to the client the specifics so that they are correct.

Day 15

I optimized the products section and provided important features on the Kitchen Exhaust Hood. Sir Bernabe saw my work and handed me the next task of the Service page. I made a layout to provide him with an idea of the concept in a visual way. Moreover, Sir Jerico showed me how to install the Ricoh scanner that needed the creation of a shared file and the setting of IP addresses of both computers to share them with the scanner.

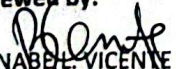

Day 16

I went on with the development of the websites and examined the presentation slides to get pictures. I have gathered and sorted the images that correspond to the site sections with the help of Figma. I also enlarged the pictures so that they were of high quality and usable.

Day 17

I helped Sir Charles and Sir Jerico relocate IT equipment to the new HR Building, and this included cleaning equipment and wiring. I learnt how to find a live LAN cable, and Sir Jerico showed how to fit a wall socket of a LAN cable. I checked the wiring lines, found the cables with the tester and was able to crimp an RJ45 connector successfully. Lastly, I helped in the alignment of the CCTVs.
