### Weekly Accomplishments

*The student trainee should give a summary of the tasks performed during the week and how it was accomplished.*

#### Day 38

As for this day, I focused on both web development and office administration tasks. In the corporate website, I added breadcrumbs for the purpose of improving the general user experience and the ranking of the page on search engines. I also updated the Service Request Forms requested by Sir Bernabe, where I added a specific field for the "bincard no." In the afternoon, I moved on to administrative duties, which involved organizing physical files. I sorted bincard forms into their respective folders and arranged them alphabetically in the file cabinet. Moreover, I made new folders and labeled them to correctly place bincards that did not have any storage previously.

#### Day 39

This day was assigned to me for system testing and records management. I conducted SMTP testing on the website by sending messages to contact forms first before deciding on the messages going to the respective designated email addresses. On the other hand, the physical records management part was to update the "ISO-PAMPANGA OFFICE-BINCARD" label of the folder to "ISO-LA UNION OFFICE-BINCARD" to ensure correctness. In addition to that, the encoding of the bincard from MaYo Holdings and Construction, Inc. (MHCI) to the digital system was my priority. The last thing I did was to organize the rest of the paperwork by correctly filing the "NA" bincards into their designated folder.

#### Day 40

Towards the end of the week, I had an instruction from Sir Jericho, where I was taught how to use the Ricoh scanner in the office as well as how to troubleshoot and fix problems if it was not working. Sir Jericho showed me how to detect and rectify system errors, cancel any tasks, and how to restart the system. Not long after that lesson, I was transferred to a clerical job, which was about better organizing things in the office. I was tasked to find a few physical folders and modified the folder names compared to the original ones, I used a color-coding technique and fonts which the company has been using. This allowed for visual uniformity and efficient file management for the team.
