

WEEKLY JOURNAL

Last Name RIO	First Name JOSHUA ALNIE	MI P.
STI Campus STI COLLEGE TANAUAN	Program BSIT	Year Level 4
Host Company MaYo HOLDINGS AND CONSTRUCTION (MHC), INC.	Department Assigned to MITSD	Section B
Schedule (Date): March 16, 2026 - March 19, 2026	Number of Working Hours: 32 HRS	

Weekly Accomplishments

The student trainee should give a summary of the tasks performed during the week and how it was accomplished.

Day 28 - Used practical knowledge about a web design to locate and correct the current design errors, which helped greatly in the overall design of the project. I was also able to offer technical assistance to a Maam Doris who had an equipment breakdown in one of the meetings. Since the situation was dire due to her being in a meeting and she needed another headset, we temporarily gave her my PC's headset while I diagnosed hers. After the diagnosis, I found a hardware defect which is a broken center speaker, and I officially reported a damage report about the defective unit that was verified by Sir Jerico.

Day 29 - Further work on the designated web project, with the focus on the UI changes and rectifying the functionality of buttons in order to be presented by Sir Bernabe as an update on where the website is headed. I also reviewed the architecture of the site and addressed a structural conflict by having the service-related contents moved out of the "About Us" page into the page named Services. Moreover, I worked with the MITSD team to gather necessary personnel information (middle initial and surnames) to complete the directory of the site.

Day 30 - Concentrated mostly on the mobile responsiveness of the web site of the about us page and homepage. I have detected and fixed a number of layout breaks that happen on mobile devices and made sure that the site is completely cross-platform and that the user experience is smooth. Maam Yvette advised me to seek out a design that involved dividers to separate sections that I did with the shape dividers on elementor.

Day 31 - The main work I was engaged in was to keep on with the mobile responsiveness updates of the rest of the web pages and especially the Services section. To address the problem of misaligning due to the stickiness of the zigzag design when used on smaller screens I added a layout breakpoint of 1024px, so that the zigzag format is not used on handheld devices. Other than web development activities, I was also involved in the cleaning of the recollection meeting that followed after the meeting with Sir Charles and assisted Sir Jericho in moving the computers of the accounting department.
