

WEEKLY JOURNAL

Last Name RIO	First Name JOSHUA ALNIE	MI P.
STI Campus STI COLLEGE TANAUAN	Program BSIT	Year Level 4
Host Company MaYo HOLDINGS AND CONSTRUCTION (MHC), INC.	Department Assigned to MITSD	
Schedule (Date): APRIL 13, 2026 , APRIL 17, 2026	Number of Working Hours: 40 HRS	

Weekly Accomplishments

The student trainee should give a summary of the tasks performed during the week and how it was accomplished.

Day 45

My primary activity today was the administration of assets tracking & management. I would have revised the activity records of the bincards, both physical and electronic and any missing or mismatched records were duly reconciled. In the second half of my shift, I was performing technical support of the Holy Mass of the company by preparing and calibrating the cameras, projector and projector stand to the event.

Day 46

My first part of the shift was spent on the backend web development i.e., optimization of the PHP function routing in such a way that the codebase of the webpage would be easier to modify in the future. I went back to administrative work during the rest of the day, balancing physical and electronic bincard records. This included updating of key assets records like assigned custodians, date of issue, physical location and status of operations.

Day 47

I also continued with the already existing inventory management and I made sure that there was an extreme match of the data between physical bincards and system database. I also made and marked new labeled folders of the Multipurpose Building and the OSSD in order to better organize the physical records.

Day 48

I proceeded with the asset inventory files and found that there were some discrepancies in the data since the physical records did not correspond to the digital database. To overcome these inconsistencies I was extremely keen and verified the history of the lifecycle of the affected assets and ensured that the appropriate information is used prior to the final system updates.

Day 49

Today, I was taking an interest in records segregation and physical archiving. I systematized the file of the company bincard system, to identify the Non-Active (N/A) assets, and then classified the assets bincard according to their year and then moved, with sir jericho, the assets bincard to their particular archive storage to streamline the filing system for future backtracking.
